

# 3200W High Reliable True Sine Wave with UPS DC-AC Power Inverter NTU-3200 series

DC input side

AC output side

IEC62368-1 EN62368-1 (for 112/124/148 TB type only) TPTC004 AS/NZS 62368.1  
Please refer to page3 for more details.

## Features

- Built-in UPS function (AC by-pass)
- True sine wave output (THD<3%)
- High surge power up to 6400W
- Temperature controlled cooling fan
- AC output voltage and frequency selectable by DIP S.W
- -25°C~+70°C wide operating temperature
- Power ON-OFF remote control
- Front panel indicator for operation status
- Protections :

Input : Reverse polarity / DC. low alarm / DC low shutdown / Over voltage

Output : Short circuit / Overload / Over temp.

- Battery over discharge protection (low voltage disconnect)
- Suitable for lead-acid or li-ion batteries
- Remote controller

(IRC1, IRC2, IRC3 accessory sold separately, please refer to: <https://www.meanwell.com/webapp/product/search.aspx?prod=IRC1> )

- Support RS-232 communication(Communication cable order No.: RJ11-RS232, sold sperately)
- Carry handle accessory available(Order NO.: Carry handle, sold separately)
- Conformal coating
- 3 years warranty

## Applications

- Home and office appliance
- Power tools
- Portable equipment
- Vehicle
- Yacht
- Off-grid solar power system

## GTIN CODE

MW Search: <https://www.meanwell.com/serviceGTIN.aspx>

## Description

NTU-3200 is a 3200W highly reliable off-grid true sine wave DC-AC power inverter with built-in UPS function. Its key features include: digital design with MCU control, streamlined control circuitry that quickly responds to environmental changes and improves reliability, high quality fan with low acoustic noise, 6400W peak power, adjustable AC output voltage and frequency, -25~+70°C wide operating temperature range, complete protection features, and etc. Combined with batteries, the NTU-3200 is suitable for use in residential, commercial, marine, automobile, mine, construction site, and remote areas with no access to utility power, and the output can be used to power fans, TV, radio, phone charger, PC/laptop, lighting, induction stove, air conditioner, electromechanical tool, communication equipment, power distribution cabinet, outdoor camping equipment, marine AC power, factory equipment, and etc.

## Model Encoding

NTU - 3200 - 1 12 US

## SPECIFICATION

MODEL NO.		NTU-3200-112	NTU-3200-124	NTU-3200-148	NTU-3200-212	NTU-3200-224	NTU-3200-248		
		<input type="checkbox"/> = US, UN, TB			<input type="checkbox"/> = EU, CN, AU, UK, UN, TB				
<b>AC OUTPUT</b>	RATED POWER(Continuous)	3000W			3200W				
	OVER RATED POWER(3 Min.)	3500W			3680W				
	PEAK POWER(10 Sec.)	4500W			4800W				
	SURGE POWER(30 Cycles)	6000W			6400W				
	AC VOLTAGE	Factory setting set at 110VAC 100 / 110 / 115 / 120Vac selectable by DIP S.W			Factory setting set at 230VAC 200 / 220 / 230 / 240Vac selectable by DIP S.W				
	FREQUENCY	Factory setting set at 60 ± 0.1Hz 50/60Hz selectable by DIP S.W			Factory setting set at 50 ± 0.1Hz 50/60Hz selectable by DIP S.W

Conducted		BS EN/EN61000-4-6		Level 2					
Magnetic Field		BS EN/EN61000-4-8		Level 1					
Voltage Dips and Interruptions		BS EN/EN61000-4-11		>95% dip 0.5 periods, 30% dip 25 periods, >95% interruptions 250 periods					
<b>OTHERS</b>	MTBF	319.3K hrs min. Telcordia TR/SR-332 (Bellcore) ; 30.3K hrs min. MIL-HDBK-217F (25°C)							
	DIMENSION	420*270*98mm (L*W*H)							
	PACKING	8.6Kg; 1pcs/ 10.4Kg/ 1.39CUFT							
<b>NOTE</b>	1. Efficiency, AC regulation and THD are tested by 2400W load, linear load at 12.5Vdc/25Vdc/50Vdc input voltage.								
	2. No load dissipation at non-saving mode(Typ.): 112/124/148 for 25W, 212/224/248 for 55W.								
	3. All parameters not specified above are measured at rated load, 25°C of ambient temperature and set to factory setting.								
	4. Internal pre-start circuit, the setup time is 8s.								
	5. The power supply is considered as an independent unit, but the final equipment still need to re-confirm that the whole system complies with the EMC directives. For guidance on how to perform these EMC tests, please refer to "EMI testing of component power supplies." (as available on <a href="https://www.meanwell.com/Upload/PDF/EMI_statement_en.pdf">https://www.meanwell.com/Upload/PDF/EMI_statement_en.pdf</a> )

## DERATING CURVE

## Block Diagram

Note:

- The inverter operates in AC bypass mode when the AC input is connected and remains within  $\pm 16\%$  of the AC output setting. During this mode, energy from the AC input is directly supplied to the loads. Conversely, the inverter switches to inverter mode when there is no AC input available or the AC input exceeds  $\pm 16\%$  of the AC output setting.
- The relationship between the AC receptacle Earth and AC output-N is shown in the table below.
- The AC receptacle earth and FG are electrically identical in the hardware and are shorted together.
- The bypass relays remain in NC position when the inverter is turned off. As a result, energy from the AC input can still pass through the inverter to the loads, operating as in the AC bypass mode.

Operating Mode	Connection Status Between AC Output and AC Receptacle Earth
Inverter Mode (Battery input)	The AC Output-N pin, AC Receptacle Earth and FG are shorted internally
Bypass Mode (AC mains input)	The AC Receptacle Earth and FG are shorted internally. AC Output-L/N depends on AC mains input

### ■ IRC1/2/3 Remote Controller (Accessory sold separately)

- IRC1/IRC2/IRC3 is the monitoring and control unit.
- IRC1/IRC2/IRC3 can decode the RS-232 signals sent by the inverter series and display through digital meters.

Note: Part of the control signals will not function properly due to different compliance of each model.

※ Please refer to for more detail: <https://www.meanwell.com/webapp/product/search.aspx?prod=IRC1>

### ■ Support RS-232 Communication

- The internal data of single NTU-3200 can read through RS-232.

※ Please refer to for more detail: <http://www.meanwell.com/manual.html>

※ RJ11-RS232 Communication cable should be ordered separately, Order No.: RJ11-RS232

### ■ Remote ON-OFF Control (Built-in)

Remote ON-OFF	AC Output Status
Open	power inverter ON
Short	power inverter OFF

### ■ AC Output Voltage, Frequency, Power saving mode selectable by DIP SW

Output voltage and frequency setting factory settings are either 110Vac/60Hz or 230Vac/50Hz, users are able to adjust the voltage and frequency, through the DIP switch of position 1,2,3,4 on the panel.

Type-US

AC Output Voltage, Frequency, Power saving mode selectable by DIP SW			
SW1	SW2	SW3	SW4
OFF	OFF : 100Vac or 200Vac	ON : 50Hz	ON : Saving mode
OFF	ON : 110Vac or 220Vac		
ON	OFF : 115Vac or 230Vac	OFF: 60Hz	OFF: Non-Saving mode
ON	ON : 120Vac or 240Vac		

■ LED STATUS

Normal work:

	Green	Orange	Red
Status	 System check	 Remote off	 Abnormal Status (See below table)
	 Inverter OK	 Saving mode	

	Green	Orange	Red
DC Input	 12.5~15.5Vdc	 11~12.5Vdc	 <11Vdc or >15.5Vdc
	 25~31Vdc	 22~25Vdc	 <22Vdc or >31Vdc
	 50~62Vdc	 44~50Vdc	 <44Vdc or >62Vdc

Mains Priority status:

	Green	Orange	Red
Load	 <40% load	 40~80% load	 >80% load

Battery Priority status:

	Green	Orange	Red
Load	 <40% load	 40~80% load	 >80% load

	Green	Orange	Red
AC Input	 Mains OK	-----	-----
	 Mains error	-----	-----
	 Mains disconnected		

Abnormal status :

LED Indicator	Abnormal Indication
Status  DC Input  Load 	Output overload or AC output short circuit
Status  DC Input  Load 	Abnormal DC voltage
Status  DC Input  Load 	Over temperature or Fan lock
Status  DC Input  Load 	Inverter fail

-  Light
-  Light off
-  Flash

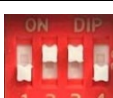

■ **FUNCTION MANUAL**

Battery /Mains Priority Setting (factory setting mains priority)

1. DIP S.W setting battery priority mode

Step	Action	Note
A1	When the power is not being sent, turn the 2 and 3 DIP switches of the selected DIP_SW to the "OFF" state	
A2	BAT power supply in remote off mode	
A3	Within 15 seconds of power transmission, switch 2 and 3 of the DIP_SW to full "ON", and then switch back to full "OFF"	 → 
A4	All LEDs (except AC input) flash green 3 times, indicating that the setting is successful	
A5	Turn off NTU and turn on the external Remote switch	 → 
A6	Turn on NTU to load battery priority mode	

2. DIP S.W setting mains priority mode

Step	Action	Note
A1	When the power is not being sent, turn the 2 and 3 DIP switches of the selected DIP_SW to the "ON" state	
A2	BAT power supply in remote off mode	
A3	Within 15 seconds of power transmission, switch 2 and 3 of the DIP_SW to full "OFF", and then switch back to full "ON"	 → 
A4	All LEDs (except AC input) flash green 3 times, indicating that the setting is successful <i>(Only clear battery priority mode, don't restore factory setting)</i>	
A5	Turn off NTU and turn on the external Remote switch	 → 
A6	Turn on NTU to load mains priority mode

## ■ Accessory List

※ Communication cable (Optional accessory, Power inverter and Communication cable should ordered separately)

MW's Order No.	Item	Quantity
RJ11-RS232		1

※ Carry handle (Optional accessory, Power inverter and Pull handle should ordered separately)

MW's Order No.	Item		Quantity
Carry Handle	①	Handle 	1
	②	Foot pad 	4
	③	Screw 	2

① Handle

② Foot pad

※ Terminal protector mating along with NTU-3200 (Standard accessory)

Item		Quantity
①		1
②		1
③		4

## TYPICAL APPLICATION

- 1 Battery Bank
- 2 Off-Grid DC/AC Solar Inverter (NTS series)
- 3 AC Outlet

- 1 Utility Input (Shore)
- 2 AC/DC Battery Charger (PB/NPB/NPP series)
- 3 Battery Bank
- 4 Off-Grid AC/DC Power Inverter (NTS series)
- 5 AC Outlet

- 1 AC/DC Battery Charger (PB/NPB/NPP series)
- 2 Battery Bank
- 3 Off-Grid DC/AC Inverter (NTS series)
- 4 AC Outlet
